

Best Seller Homes - Part II

VENTURA, CA—*Automated Builder* welcomes its readers to discover the latest and greatest homes from engineered home builders across the U.S. and Canada. This year's featured homes include panelized, modular, HUD-Code, log and timber frame models in a wide variety of designs.

At the end of each home's description you will find additional statistics on the home as well as information on the geographic market that the manufacturer serves. More information on each model can be obtained by visiting the builder's website.

We invite you to tour this month's collection and discover some of the many reasons more people are choosing engineered homes than ever before. — *AB*

"Spacious and golden" are the defining words for this stunning modular ranch model M3R66-10 by Liberty Homes. Rooms flow together seamlessly making the home feel twice the size it is. Nine-foot ceilings throughout add to the voluminous feeling and transom windows complete the roomy effect. The super-sized kitchen island is big enough for the whole family while an enormous corner pantry and walk-in closets provide plenty of storage. A master bath corner soaker tub and reverse tray ceiling in the dining room make this home the height of elegance. A home that needs to be seen to be believed.

Size: 1,731 sq. ft. Market: U.S.A. and Canada.
